Hi,

Hope you're keeping safe and doing well.

Thank you for showing interest in working with Stack Finance. There are millions of great companies out there, and we appreciate your interest in joining our team.

Based on your application and credentials presented, we are now pleased to move you to the next round of discussion. **Please acknowledge this mail.**

As the next steps, please see the requirements below:

Task:

- Create a notes app
- User can login/signup using email or google auth
- Save data in firebase db
- User can change password
- Password should be encrypted
- User can create note and add text and/or image
- List Notes with title and 2 line content if text
- Detail page for note
- Note should be editable
- User should be able to see, edit and create new note even when there is no internet (Data should be synced when there is internet)

To be submitted: -

- Fully functional application with necessary validation checks in place.
- Give access to the Firebase DB on yash@stackfinance.co and dakshesh@stackfinance.co
- Host your project to GitHub and share the link of the same.
- Apk file

DEADLINE - 29th April 2021, 11:59 PM

Please feel free to make assumptions on any open-ended use-case. In case of doubts, please revert to the email thread using the **Reply all** button.

Looking forward to your quick submission.

All the best!

Regards,

Stack Finance - Talent Acquisition
